## Full Stack Web Developer

## Professional Summary

Highly proficient Full Stack Web Developer with expertise in MERN stack. Proven track record of successfully completing individual and collaborative projects. Strong in React, Node.js, and RESTful APIs. Excellent problem-solving skills and attention to detail. Available to contribute technical excellence in a dynamic web development environment.

## Projects

### MoneyMingle [Live Demo Link](#) [Github Repo Link](#)

- HTML
- CSS
- JavaScript
- RESTful API

- Developed MoneyMingle, a fintech website focused on financial transactions and currency conversion.
- Designed and implemented user and admin registration and authentication functionality to ensure a secure user experience.
- Created features for CRUD operations related to money transactions, including dynamic currency conversion for transactions.
- Implemented real-time updates of transaction history with dynamic time and date information.
- Utilized a tech stack comprising *JavaScript*, *HTML*, *CSS*, and *RESTful API* for seamless web development.

### ONFLICK [Live Demo Link](#) [Github Repo Link](#)

- REACT
- RESTful API
- CSS3

#### Modular Architecture

- Designed and developed ONFLICK, an e-commerce website that offers a seamless shopping experience.
- Implemented robust user and admin registration and authentication functionality for enhanced security.
- Created and managed key features, including add-to-cart and wishlist functionality with CRUD operations.
- Introduced user-friendly enhancements like infinite scrolling, filters with URL modification, and the ability to add or delete products from the user's order list.
- Utilized a technology stack consisting of *REACT*, *CSS3*, *RESTful API*, and *JavaScript* to ensure a dynamic and responsive web platform.
